

## Trojan Fund (Ireland)

The Fund seeks to achieve growth in capital, ahead of inflation (UK Retail Price Index), over the longer term (5 to 7 years). The Fund employs a long-term, long only approach and has the flexibility to invest across a broad range of asset classes, most commonly a combination of high-quality developed market equities, developed market government bonds, gold related investments and cash.

## June Commentary

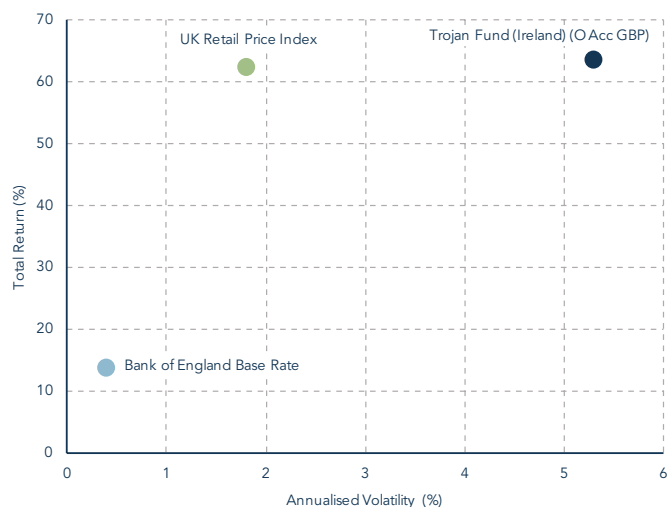

Your Fund (O Acc GBP) returned +1.0% during the month.

During June the Fund's holding in Becton Dickinson was sold. Becton makes a diverse range of medical products but is best known for its dominance in the syringe market. The shares were purchased in mid-2020, following a challenging period for the company. Our expectation was that the business would recover as the world reopened after covid lockdowns and routine medical procedures resumed. Becton also had new management that promised to improve product innovation and operational execution, leading to faster sales growth and a falling debt burden. Since purchase the shares have generated a positive total return, but the company has continued to face operational challenges and financial progress has been sluggish. Debt levels also remain stubbornly high. We sold the shares as we expect progress to continue to be slow and have not seen sufficient change at the business.

The Fund also started a new holding in Verisign, reflecting our desire to add attractive stock-specific opportunities when they arise. The business is the exclusive registry for .com and .net domains, meaning any company that buys a .com web address ultimately purchases it from Verisign (via a retailer like GoDaddy). As well as keeping a record of domain ownership, they operate a system called DNS that points users accessing a web address to the correct server. DNS can be thought of as the signpost for the internet, directing billions of internet queries every day. Verisign have provided uninterrupted service for over 20 years and are rewarded by being able to gradually raise prices for domains. Recent weakness in China domain registrations (now only 5% of the business) and the valuation falling from 40x PE to 21x after covid extremes has resulted in dull recent share price performance, despite continued profit growth. We expect Verisign to grow sales and profit margins through modest growth in the number of web addresses, gradual price rises and operating leverage.

## Important Information

Please refer to Troy's Glossary of Investment terms [here](#). Fund performance data provided is calculated net of fees with income reinvested unless stated otherwise. All performance and income data is in relation to the stated share class, performance of other share classes may differ. Past performance is not a guide to future performance. Overseas investments may be affected by movements in currency exchange rates. The value of an investment and any income from it may fall as well as rise and investors may get back less than they invested. The historic dividend yield reflects distributions declared over the past twelve months as a percentage of the fund's price, as at the date shown. The yield is not guaranteed and will fluctuate. It does not include any preliminary charge and investors may be subject to tax on their distributions. The UK Retail Prices Index (RPI) is a target benchmark for the fund as the Fund aims to achieve a return (the money made or lost on an investment) that is above the rate of inflation, reference to other benchmarks are for comparative purposes only. Tax legislation and the levels of relief from taxation can change at any time. Any change in the tax status of a Fund or in tax legislation could affect the value of the investments held by the Fund or its ability to provide returns to its investors. The tax treatment of an investment, and any dividends received, will depend on the individual circumstances of the investor and may be subject to change in the future. There is no guarantee that the objective of the investments will be met. The Fund may use currency forward derivatives for the purpose of efficient portfolio management. The UK RPI figures shown are a combination of the actual rate of RPI, as calculated by the Office of National Statistics, and estimates for the previous month. This is a marketing communication.
