June Commentary

Your Fund returned -1.9% during the month compared to +0.8% for the MSCI World Index NR GBP.

We have established a new investment in VINCI. The company is one of Europe's largest infrastructure and contracting groups, operating across three pillars: Concessions (French toll roads and a global airport network spanning 70+ airports), Energy Solutions (electrification, grid, renewables and digital infrastructure services), and Construction. The Group generates roughly €75bn in revenue across more than 120 countries, blending the predictable, inflation-protected cash flows of long-dated infrastructure assets with the capital-light, structurally growing Energy Solutions business.

Most of the intrinsic value sits in the concession and energy arms rather than traditional contracting. The opportunity arises because the market is pricing VINCI as a declining French toll-road operator with a finite asset base, overlooking the breadth and quality of the rest of the group. French political risk, recent tax increases, the approaching motorway concession expiry (2032–36), plus a spike in oil prices weighing on traffic have all contributed to a [de-rating](#) that stands in contrast to comparable infrastructure, airport and energy-services peers.

What makes VINCI compelling beyond the discount is the combination of durability and optionality. The motorway cash flows, while finite, are fully understood by the market and provide a reliable source of cash to invest in long-term projects that are expected to generate attractive returns for shareholders. The airport portfolio anchored by ANA in Portugal, Gatwick and Kansai rebuilds concession duration and benefits from structural passenger growth. Energy Solutions, already a third of group value, is exposed to electrification, grid modernisation and data-centre buildout, offering mid-to-high single digit organic growth with attractive returns on capital. The construction arm of the business is not a major source of growth today, but it is well placed to benefit from any recovery in European infrastructure spending.

The stock currently trades on just 13.5x 2026 [earnings](#) with a 4.3% [dividend yield](#) representing excellent value.
