June Commentary

Your Fund returned -0.6% during the month compared to +2.7% for the MSCI World Index (NR) GBP.

We invested in Sysco in May and June. Sysco is the largest foodservice distributor in the US, serving over 700,000 customer locations across restaurants, healthcare, education, and travel. Though structurally well-placed in a growing "food-away-from-home" market, investor sentiment has soured due to a recent lag in sales at high-margin independent restaurants. While this segment is recovering more slowly than expected, we believe concerns are overdone. The company's core competitive edge, its scale, is intact and growing. Sysco is taking the right steps to reignite momentum through salesforce investments and a focus on growing its specialty businesses, such as custom meat, fresh produce, and imported goods. These are categories that carry higher profit margins and foster customer loyalty.

We have owned Sysco in the past but exited the position in late 2017. Since then, the company has expanded internationally through the acquisition of Brakes Group in the UK and in its growing specialty portfolio. The essence of the business remains the same. Sysco's moat is rooted in its relative

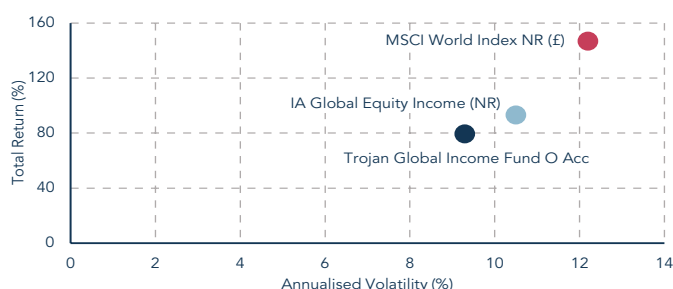

scale, dense distribution network, and superior logistics. It is not a business that needs to change dramatically to succeed. While recent headwinds around local restaurant volumes have clouded the picture, national accounts continue to grow profitably, underpinning the route density that makes local accounts viable.

Currently at around 16x forward earnings¹, the shares are attractively valued particularly for a business with defensive characteristics, durable competitive advantages, and a 55-year record of dividend increases. Despite near-term noise, Sysco continues to grow both earnings and [free cash flow](#), with buybacks enhancing per-share returns. We expect long-term revenue growth in the mid-single digit range and an improving capital return profile, making it a compelling income-generating holding in the portfolio. The dividend yield of 2.7% adds to the appeal in today's uncertain environment.

¹Forward earnings of 16x reflects the share price divided by forecasted earnings over the next 12 months; it is used as a common valuation measure.
